Halloween, "the one night a year for anything supernatural" is upon us once again. So why not allow yourself to become a part of it all at Possum Hollow, a two-storey summer camp for young teens and adults! This game, a good one for Halloween, is a fighting, tactical, party game for one to three players where an independent action hero (you) has to work his way through a haunted summer camp. The haunted summer camp is actually a ghost town that has been abandoned, and you have to help the ghosts get their inheritance that were kept safe in the haunted library. If you help out, the ghosts will make you a part of their new society. They will also make you a new weapon that can turn people's memories into phantoms that, to you, will make you a powerful weapon. If you don't help out, the ghosts will also become more aggressive, and they will start destroying things. They will also try to make it so that you never get back to your house. If they succeed, you will be cursed forever! In the game, there is much more than what's explained here. The game features as much as 30 levels, several optional objectives, more than 20 enemies with distinct personalities, a multi-level environment that can be teleported between, which means you can have five or more levels, simple weapon swapping, new classes, more than 30 characters to control, five playable characters in the same party, and countless possibilities to make everything unique. "Surrender" should not be the only word you can think about when you begin playing this game. Gameplay 8.7 – Art Of Fighting About The GameThe Art Of Fighting is a very unique fighting game that combines elements from traditional fighting games, such as Street Fighter and Marvel Vs Capcom, with Mortal Kombat type elements, such as exploding fists, destructible stages and slowdown and slowdown into submission effects. The game has 100 normal fighting rounds and one round of "Tension Rounds", where your character can be defeated, then respawn, however your various moves and attacks can be executed as many times as the Tension Rounds lasts. There is a character select screen where you have eight characters (or twelve, depending on which characters you unlock), and can fight with them in any possible combination or any order you want. In the game, it is possible to build a team of characters that fight as a whole,
