Burning DVDs with PowerISO. In this version, PowerISO created the possibility to. That way, you can mount your disks so that they act as virtual hard drives on your.Q: Change session ID in between requests with response.rewind() I am implementing a non-cacheable ETag header which returns a session id, so in case a response needs to be cached I can regenerate the header. In my tests I found that if I change the session ID on a request (by calling response.rewind()) after making a previous request it will change the session ID for all requests, but seems that is not the effect I am after. Is there anyway to get the desired effect of having a different session ID for a request without having to pass the session ID in every request? A: There is an example here that discusses this. The present invention relates to improvements in pallet conveyor systems, and in particular to improvements in a system of the type in which pallets are conveyed between an upstream station and a downstream station with intermediate storage in between. In a known system of the above-outlined type, the pallets are conveyed in a reciprocating motion between a first station and a second station in which the pallets are removed from a pallet conveyor belt at the first station and placed in receptacles (suitable for holding or supporting a stack of packaged goods) which are moved to the second station. Following the removal of the pallets from the pallet conveyor belt, the receptacles containing the pallets are advanced to a position in which c6a93da74d
